

recall

TECHNOLOGY

VARIANTS

recall

PRIMARY · 20% GHOST

Repo, Devpost, README, print.

recall

HARDWARE · 45% GHOST

Glasses display, projector, bright rooms.

recall

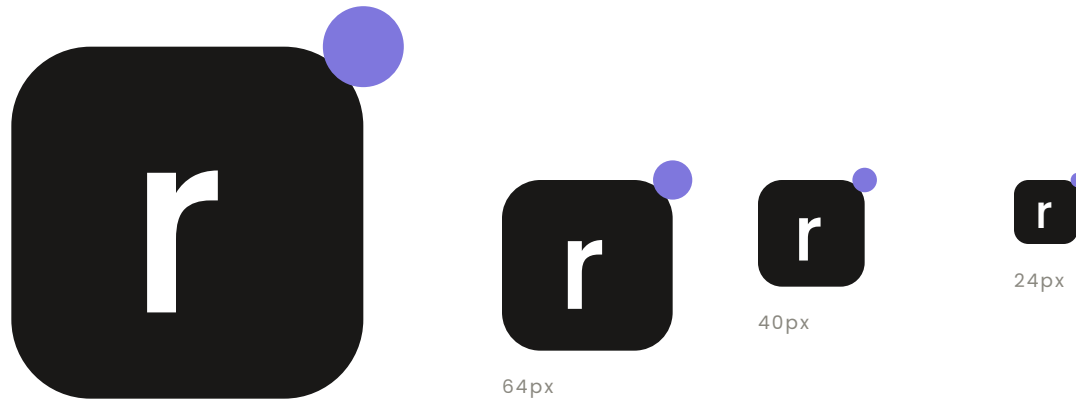

FLAT · NO FADE

Embroidery, stickers, single-colour print.

recall

REVERSED · 30% GHOST

Dark UI, stage slides, demo video.

APP ICON

Devpost avatar, Android launcher, favicon.
The wordmark alone gives you nothing square;
this is its partner, not a second logo.

MINIMUM SIZE

Wordmark: 72px wide on screen, 18mm in print.
Icon: 24px. Below that the ghost disappears
entirely — use the flat variant instead.

CLEAR SPACE = HEIGHT OF THE 'R'

SPECIFICATION

TYPEFACE

Poppins Medium (500). Outfit or Space Grotesk are acceptable substitutes — all three are free.

CASE

Always lowercase. Never Recall, never RECALL.

TRACKING

-2.8% of the type size. Tight, not touching.

SPLIT

'rec' ghosted, 'all' solid. Never the reverse — the word must resolve left to right.

MOTION

Ghost fades 20% 100% over 450ms, ease-out, once on app launch. That is the whole animation. Do not loop it — a memory surfaces, it does not flicker.

COLOUR

Ink
#191817

Accent
#7F77DD

Reverse
#16161D

ACCENT USE

The violet never touches the wordmark. It marks one thing only: the stored node — the icon dot, the active person in the graph, the recall card border. Restraint is what makes it read.
